

EDUCATIONAL PRESENTATION SOFTWARE

Customised Enriched Special E-Book

We offer RichBook, which is prepared according to the needs of the educational institutes and publishers, in CD, DVD, FLASH DISK (USB MEMORY) or downloadable format.

RichBook is an interactive educational presentation and collaboration software developed by the RichBook team, designed for use textbooks in the classroom with any interactive whiteboard, interactive projector and any updated 4K interactive touch screen flat panel display. RichBook expands your teaching tools with versatile illustration and interesting presentation possibilities. Brilliant interactive content and built-in skill-developing, illustrative and educational game activities help to arouse students' interest and help to acquire knowledge.

RICHBOOK

3.1.2. Compare Answers

This activity is useful to check all answers of a fill in the blanks type activity. Once you write all your answers with the **pen tool** on the right side of the screen, move the slider down and up to show or hide correct answers on the left side of the screen.

3.1.3. Show Answers

This activity is used to show all answers or solutions of an activity in a separate popup window. The answer window can be floated on the screen.

Example

Amly reads 12 pages each day.
How many pages will she read
in 8 days?

3.1.4. Click and See

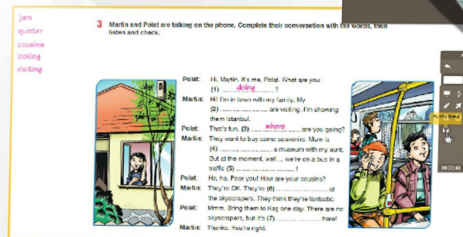

This activity shows the answers of an activity on the same place of the pdf book. The first mouse click shows the answers and the second mouse click hides the answers.

3.1.5. Drag and Place

This activity requires moving the text boxes or objects on one side of the page. It can be used as fill in the blanks with the given items.

- The topic content of the activity can be in text, sound, image or video.
- The items can be dropped any place of the page. There is no limit on the number of items.
- Click the **show answer** button on the toolbar to see the answer.
- Stopwatch shows the elapsed time.

OUR NEWEST PROJECTS

Efficient and Fun

A Learning Environment RichBook is an educational presentation software that displays the pdf books on SmartBoard as one, two or half page formats and provides an easy and effective course presentation for teachers with RichBook standard tools. The goal of the product is to provide an efficient and entertaining learning environment for students and teachers by meeting people, information and technology in a common place. RichBook transforms the static pdf books into dynamic and interactive books.

One of the RichBook's Goals

One of RichBook's aims is to present books on the screen, to be able to switch between book pages, to zoom in and zoom-out the desired areas, to make drawing and marking studies on the book.

Used New Technology and constantly up to date

Teachers' feedback has been taking into account during development.

It comes with ready-to-use video, audio, animation, games and activities.

RichBook software produced for e-books be able to present in digital media such as computers, smart-boards or tablets. It is an educational tool software that can accommodate video, audio, animation, games and applications which makes strengthen teachers' hand and work much easier.

This software can be used on CD, DVD, portable storage devices (Flash memory or portable hard drives) or can be operated by downloading from the internet.

WHY RICHBOOK?

Question: We give the books to teachers as a PDF format. Is RichBook really needed?

RichBook is flexible software which can be used on both any interactive&smart boards and computers. RichBook's user interface supports and can adapt to varying display sizes. RichBook offers an expanding array of resources that help teachers present interactive content to blended learning.

Answer: When you give the PDF versions of your books to your teachers, you can easily replicate your books. At any moment, you may encounter a pirated edition of your publication. RichBook provides a high level of protection for your books. All pages are "encrypted". In addition, teachers cannot process your books that you provide as PDFs, and cannot use media, such as audio, video, animation, activities or games within the book..

Once you have the Windows operating system and Adobe AIR, RichBook does not require any additional technical requirements for its operation. RichBook is compatible with all types of smart-boards or touch panels. It can also be used with all projectors.

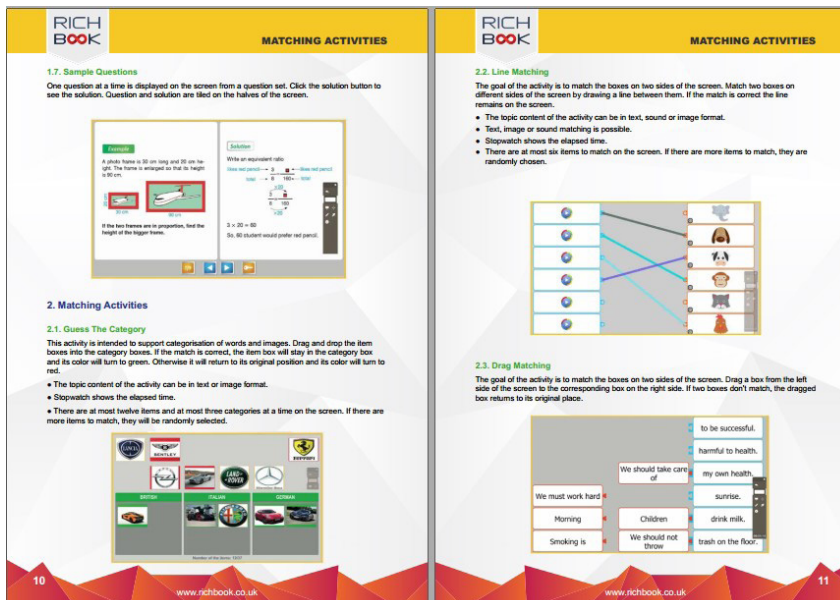

RichBook has its own toolbar, you don't need to use other smart board tools. RichBook is an offline standalone application. It can be run directly from USB memory or copied to hard disk and run. It opens the first page of the book and optionally displays a preview of the page last visited for a while.

RichBook was developed by a team of computer programmers, instructional designers and visual designers. The project saves teachers from the problem of preparing digital content and learning hard-to-use software for smart boards. This saves time for teachers' professional development and teaching activities.

RICHBOOK

RichBook is changing how people think of rich interactive books.

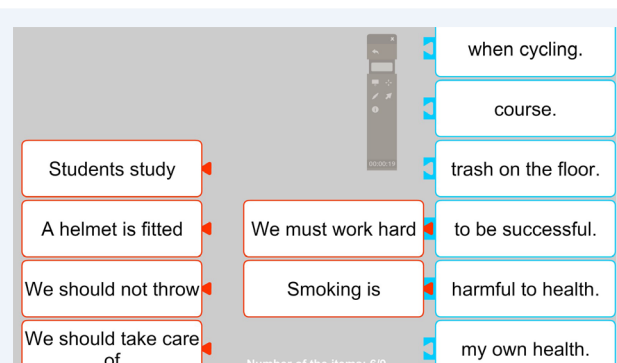

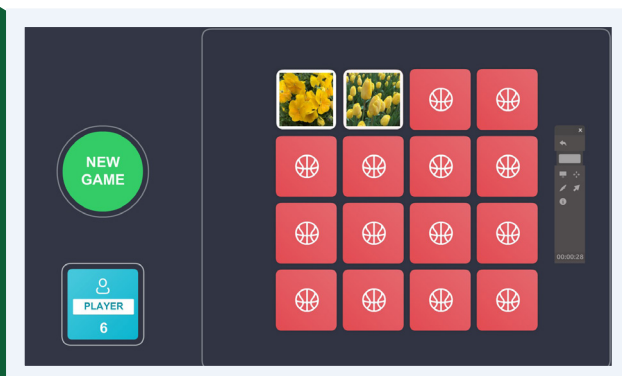

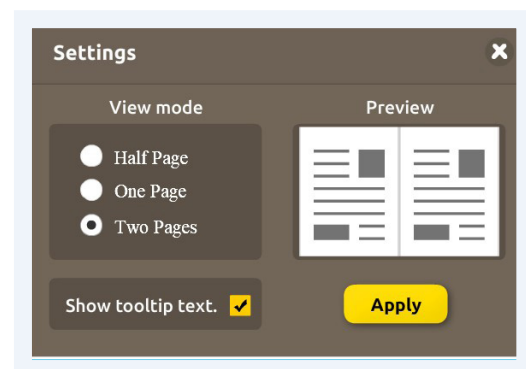

- Enrich your teaching.
- Engage your students.
- Enthral your class.

Richbook software is easy and simple to use, functions can be found where users expect them.

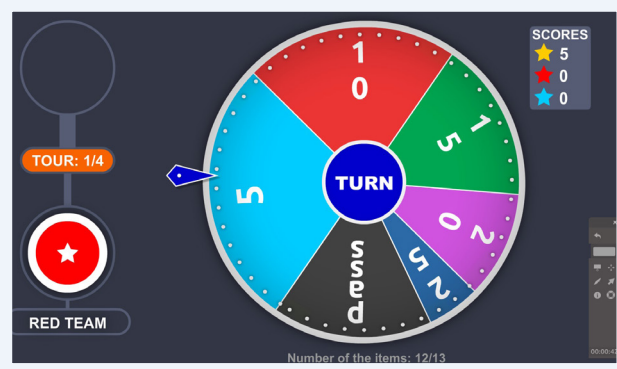

- Only the most required tools, easy to use.
- A common interface for all kinds of interactive boards.
- No installation and Internet connection needed.
- Supplementary activities and content.

New and Updated Features of RichBook

- Overall better performance.
- Higher image quality.
- Improved page navigation.
- Advanced cropping.
- Moving the single page to the left, middle and right of the screen.
- Typing with Text tool any place on the screen.
- Moving, modifying and formatting text fields.
- Show/hide solution pages or pages of teacher's book.

As digital content becomes ever more essential to curriculums, RichBook goes with your lesson flow, offering a world-class digital whiteboard that works the way you do, as well as the way you will do.

Spend less time planning and more time teaching

Multi-Touch

Enhanced multi-pen and multi-touch capabilities means users can simultaneously use and manipulate tools.

Easy to Use

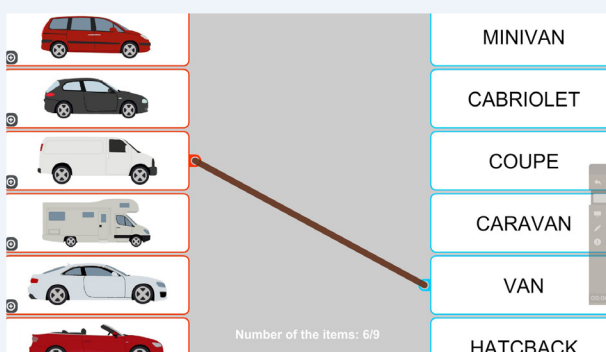

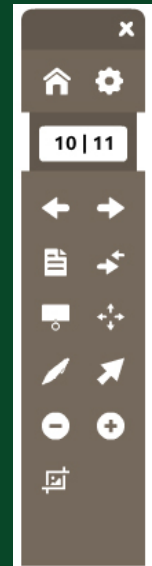

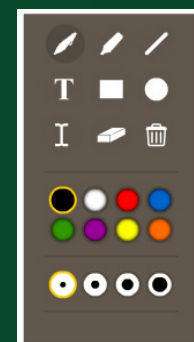

The simplistic design makes it accessible to users of all ages and levels of computer literacy. Use the multi-disciplined interface with over 20 interactive tools to create unique and powerful presentations. Our simple toolbar allows for rapid presentation building.

We believe better outcomes are possible.

Tool that gives power to the instructors.

RichBook is designed to put students at the centre of the educational environment, so they're more engaged, more collaborative, and more motivated. So they're more engaged, more collaborative, and more motivated. Inspiring students to learn sets them on a path to becoming their best selves. But the teacher still drives the instruction. RichBook helps educators open more ways for students to learn, so they develop the skills they need to succeed and tap into their unique potential.

So we make teaching easier and more rewarding and learning more exciting. When technology is at its best, it paves the way, rather than getting in the way. Teachers can do what they do best – simply teach. Make working with digital content as simple as learning your ABCs. You choose what works best for you and your school.
